Daniel Woodhead Exclusive Products

5 - 9.0w LED Handlamps @ 120v will draw less than 1.0amps of load

9.0w LED will produce approximately the same volume of light as a 75w Incandescent.

12 Volt String Lights will require a Low Voltage Transformer: 120v to 12 volt

BossLTR 120V String Lights can be used with 9.0w LED lamps or with 75w Incandescent Lamps, interchangeable.

120v to 12v String Light Transformer

Used for 5 or 8 Lamp String Light Systems
