**LEADERS IN THE PORTABLE  
STADIUM LIGHT TOWER INDUSTRY**

# One Stadium Light Tower Will Take The Place Of 10-20 Commercial Light Towers

**Custom Designs Available**

# Unlimited Hourly Usage On Gen-Sets

## Cost Savings

### Stadium Light Tower vs Ten 23' Commercial Towers

- Fuel Savings: Minimum of 200 gallons a month / 2400 gallons a year.
- Labor Savings: Automatic start and stop on stadium tower vs 30 start up and 30 shut downs per month on commercial towers.
- Labor Savings: One engine service per month on stadium tower vs 10 engine services a month on 10 commercial towers.
- Labor Savings: 8 fuelings a months for a stadium tower vs 40 fuelings a month for 10 commercial towers

## Rental Savings

### One Flat Monthly Hard Money Billing Rate

- All Boss stadium light tower rentals have unlimited monthly hour usage.
- The client can operate lights or gen-sets 24 hours a day with no extra fees.
- There is no charge for electrical, mechanical, or service repairs.
- No fees for call outs, mileage, or after hour service calls.
- No project ending charge back invoicing. You pay one flat monthly rate and it never increases during the length of your rental.

# SAFETY FIRST

## North American "Patented" Safety Telescoping Tower Features

- Boss has included into all their telescoping tower designs safety features that prevent operators from making any tower operating mistakes.
- This patented design feature takes the guess work out of the use of the push-button controller that controls all operating motion of the tower, pivoting, and telescoping functions.
- Visual operating instruction now coordinated with fail safe electrical safety controls prevent tower operator from making any operating mistakes.

For full telescoping design features and safety operation explanation please contact [info@bossltr.com](mailto:info@bossltr.com)

### New Exclusive Feature - Optional

Exclusive remote control rotation of the floodlights at ground level.  
**180 DEGREE TOWER ROTATION.**
