

SOLAR LIGHTING USER GUIDE

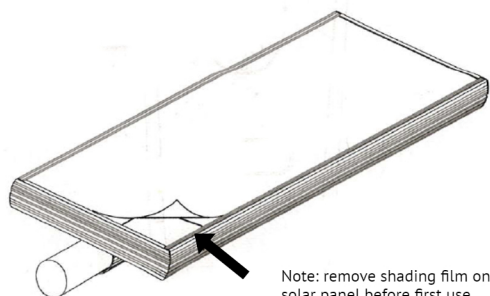

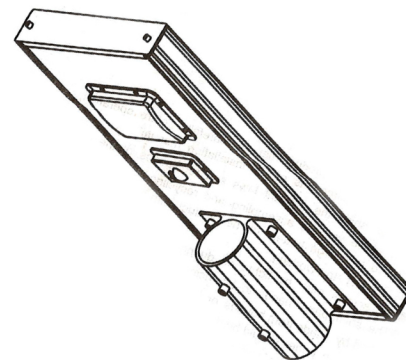

PRODUCT DESCRIPTION

Thanks for choosing this Boss solar light product. This light is 100% powered by sunlight, requires no cabling, environmentally friendly, reduces carbon footprint, waterproof rated, comes equipped with motion sensors and timer controls, requires little to no maintenance, and is fully automatic with brightness adjustment settings.

USER OPERATION AND INSTALLATION

- Please read this user guide and instruction sheet prior to operating and installing this solar light application.
- Please abide by all relevant local laws and regulations in your state or country prior to using this product.
- Product must be charged from sunlight to ensure longevity of a battery charge and performance.
- Avoid installing solar lights where sunlight may be blocked by shade, leaves, or structures.
- Please clean the surface of the solar panel regularly to improve the battery charging efficiency. Do not use harsh chemical cleaning compounds.
- All screws must be tightened during the installation and mounting process.

Motion sensor mode: Light automatically dims when no motion is detected to conserve power. Motion activates full brightness.

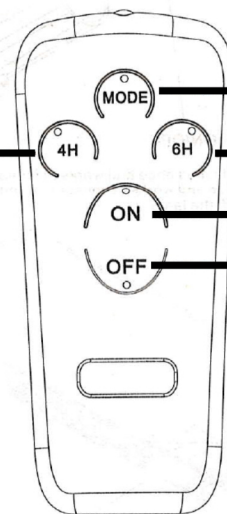

Light activates at dark and remains on for 4 hours

Switches between motion sensor or constant brightness mode

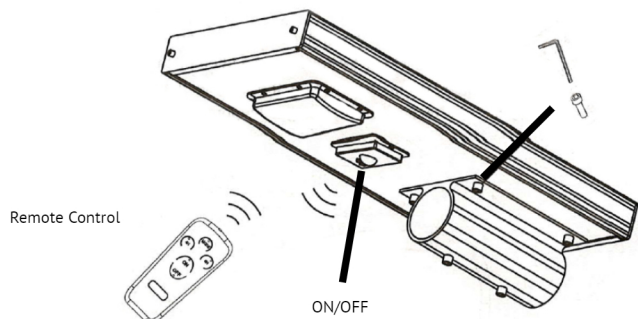

Light activates at dark and remains on for 6 hours

100% brightness turned on

100% brightness turned off

Remote Controller

1. Press the switch once. The lamp flashes once and works in motion sensor mode.
2. Press the switch again and the lamp flashes twice and remains powered on.
3. Holding the switch for several seconds will power off the light.

WARNING

- Avoid looking directly into the light fixture when turned on.
- Store solar light away from areas susceptible to fire and do not submerge the light fixture under water. Light fixture is rated IP 65.
- The disassembly process must be carried out in a safe work space.
- Attempting to repair or replace the battery is not recommended without the guidance of professional technicians.
